

BRINGING NATURE TO YOUR WORLD

Create your own native bird haven.

Creating a native bird haven in your garden is a simple and fun way for you and your family to get closer to nature. Plant some native trees, put out some clean water in a bird bath & some seed in your bird feeder and you'll be well on your way.

HARMONY™ Wild Bird seed mixes and cones have been specially formulated with a selection of seeds, fruit and nuts to attract a wide variety of native birds into your garden, whilst providing them with a healthy supplement to their natural diet.

HARMONY loves Lorikeets too! — Lorikeets are nectar eaters, not seed eaters. The HARMONY Lorikeet & Honeyeater mix is specially designed to meet their unique needs.
